

SMART INVERTER / 100 L & 150 L

Hot water. Smarter energy.

Heat from the air. Comfort for your home.

Temperature and timing, right from your phone.

150 L model shown.

AIR-SOURCE HEATING

7-DAY TIMER

APP CONTROL

eliospk.com

Your hot water, in view.

A connected everyday experience with the ELIOS Android app.

See the temperature

View live tank temperature and the selected target.

Set your comfort

Choose a heating target from 25°C to 52°C.

Plan the week

Set up to three heating windows per day across seven days.

Understand operation

See operating readings and plain-language diagnostic guidance.

Reach ELIOS support

Use available complaint and support features when connected and registered.

Actual app capture; readings are examples. The tank graphic is illustrative.

Local control. Connected services.

For local control, connect the phone and geyser to the same home Wi-Fi. Online help, registration and service features require internet and applicable access. Features vary with the installed app and unit.

Savings, with the facts.

Measured 150 L example - compare the same water-heating load.

72%

less electricity in the 150 L comparison*

2.049 kWh

Measured ELIOS energy

55 min

Measured heating time

Rs 113

At Rs 55 per kWh

*150 L heated from 9.9°C to 52.1°C at 16.4°C ambient. ELIOS used 2.049 kWh; the ideal electric-resistance baseline is 7.36 kWh (about Rs 405). The baseline is calculated, not a measured competing geyser. Costs exclude equipment, installation, maintenance and standby losses. Actual results vary.
